

Aquatic Serial Numbers

Announcing Aquatic Serial Numbers!

As seen from the front of the unit:

Serial Number

As seen on the label on the back of the unit:

License Plate #

Serial Number

The serialization has been taking place since January 2020 and has been phased in by all Aquatic plants.

Serial numbers will be required for all warehouse repairs for Aquatic customers in the coming months. We will send announcements out before making this a requirement. For now, we are requesting the information if it's available, including jobsite repair requests.

We are also in process of updating our Product Condition Reports (PCR) so there is an area for the serial number to be included on the report.

Please see attached information regarding where to find serial number locations on each type product.

Thank you all for your support!
